Walgreens Data Source: <https://www.walgreens.com/topic/findcare/long-term-care-facility-covid-vaccine.jsp#stayinformed>

CVS Data Source: <https://cvshealth.com/sites/default/files/cvs-health-covid-19-vaccination-data.pdf> ***CVS data reported through 3/30/21.

Managed Health Care Associates Source: MHA [email report]

Walgreens Facilities Assigned for Scheduling decrease includes an estimated 1200 facilities transferring to Managed Health Care Associates pharmacies for administration, as well as facilities that have opted out.

Previous data posted for Managed Health Care Associates Part B was reported in error by MHA. The data posted today has been corrected by MHA to reflect the accurate numbers for Part B (Other Long Term Care Facilities).

At this time, Long Term Care vaccinations are not fully captured in the primary dashboard above. We are working on reconciliation and will update this note when complete.

CVS and Walgreens pharmacies plans to conduct three on-site clinics at each LTC facility to vaccinate as many residents and staff as possible. During the first clinic, the pharmacists will vaccinate all staff and residents on site. The second clinic will be held a minimum of 28 days later and the pharmacists will vaccinate staff/residents from the first clinic with their 2nd dose of COVID-19 vaccine and catch anyone they may have missed on first date with their first dose. The third clinic will occur 28 days after the 2nd clinic and pharmacies will vaccinate anyone from the second clinic that needs their 2nd dose.

* retroactive data will be available next week

Data are provided each Friday to the Michigan Department of Health and Human Services by the Michigan Department of Corrections.

Age Group provides the number of individuals vaccinated that week within each age group.

Number in the medically vulnerable vaccinated group will overlap with age group information.

Why do the data from past days change and how often are data updated?

Doses administered are reported by the date of vaccination. Previously reported numbers of administered vaccine doses may change as new data are received. Providers have 24 hours to report vaccination to MDHHS. MDHHS pulls the data each morning for cleaning and then posting to the website by 3 pm, Monday through Friday.

Where can I get more information about COVID-19 vaccine?

Members of the public, please visit the MDHHS [Frequently Asked Questions](#) related to COVID-19 vaccine.

Healthcare providers, please visit the MDHHS website [COVID-19 Vaccine Provider Guidance & Educational Resources](#)

Where does the vaccination data come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?

Coverage is estimated by taking the number of vaccinated people within a geographical area or demographic group ("numerator") and dividing by the total number of people in that area or group ("denominator"). Numerators come from the number of COVID vaccine doses reported to the Michigan Care Improvement Registry (MCIR), and denominators come from the US Census counts for each county and demographic group in Michigan ([2018 single year estimate](#)). There are two versions of a coverage estimate:

- 1) "Completion" = number of fully vaccinated people in a given area or group (i.e., 1 dose of J&J or 2 doses of Pfizer or Moderna) / total population of the area or group
- 2) "Initiation" = number of people who are **either** partially **or** fully vaccinated in a given area or group / total population of the area or group

Note: County-level coverage is based on the county where a person lives, not where they got vaccinated. If someone's county or group is unknown, they cannot be included.

Is COVID vaccination administration required to be reported?

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

⁽¹⁾Each State is responsible for their activation date

⁽²⁾The completion of clinics does not include facilities that have scheduled their clinic date as our declared milestone date, or facilities that were recently allocated to Walgreens. There is a margin of 0%-3% applied in determination of completion status.

Covid-19 Vaccination information for Long-Term Care Facilities will be provided by 5pm CST Mondays through Fridays.

*Status of 'done' includes visits scheduled for today; excludes facilities that 1) requested a later date due to a COVID-19 outbreak or other reason, 2) were rescheduled due to lack of responsiveness, or 3) requested to be added to the program after the start date or didn't meet original program criteria regarding distance from CVS locations, but that CVS has opted to support.

PUBLIC USE DATASETS

COVID-19 Vaccines Shipped to Providers

README

Where does the vaccination data come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?

Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.

MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).

There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)

County is based on the county of residence.

Is COVID vaccination administration required to be reported?

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?

These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

COVID-19 VACCINES SHIPPED TO PROVIDERS 2021-04-02

PUBLIC USE DATASETS

COVID-19 Vaccine Doses Administered

README

Where does the vaccination data come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?

Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.

MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).

There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)

County is based on the county of residence.

Is COVID vaccination administration required to be reported?

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?

These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

Contains two spreadsheets: COVID-19 Vaccine Doses Administered and Doses Administered Demographics.

COVID-19 VACCINE DOSES ADMINISTERED 2021-04-02

Week Ending Date	Data as of	Person's Residence in Preparedness Region	Person's Residence in Local Health Department Jurisdiction	Person's Residence in County	Vaccine Type	Facility Type	Dose Number	Number of Doses

PUBLIC USE DATASETS

COVID-19 Vaccine Coverage

README

Where does the vaccination data come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?

Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.

MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).

There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)

County is based on the county of residence.

Is COVID vaccination administration required to be reported?

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?

These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

COVID-19 VACCINE COVERAGE BY COUNTY 2021-04-02

Week Ending Date	Person's Residence in Preparedness Region	Person's Residence in Local Health Department	Person's Residence in County	Sex	Age Group	Administration Level	2019 Census MI Population (16 years and Older)	Number of Doses	Coverage

PUBLIC USE DATASETS

COVID-19 Vaccine Coverage State Level Metrics

README

Where does the vaccination data come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?

Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.

MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).

There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)

County is based on the county of residence.

Is COVID vaccination administration required to be reported?

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?

These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.
